CTI Clinical Research Associates Rated Excellent by Sites for 8th Year in a Row

Successfully completing any project requires a team of individuals who are dedicated and hardworking. Successfully completing complex clinical trials involving critically ill patients requires a team of individuals who are also attentive to detail, efficient, communicative, and highly-experienced with unparalleled therapeutic expertise.

At CTI, our global clinical monitoring model is built around the philosophy of providing such teams to our sponsors.

CTI Clinical Research Associates (CRAs) have significant experience working with complex studies and critically ill patients. Our staff has decades of experience in research and nursing outside of their CRA experience, and with **an average annual employee retention rate of 94% over the last five years, our CRAs are able to see their studies through from start-up to close-out.**

In addition to a rigorous hiring process to ensure we only hire the best CRAs to join our team, CTI also conducts an annual CRA survey to ensure the highest level of quality.

"XXX has been the CRA for our study for several years, and has supported the study and the team through several transitions of study staff. She is knowledgeable and always accessible. She supports the staff as needed, and sets a very high bar for excellence and partnership.

She is far and above the best CRA I have worked with in >10 years of research."

About the Survey

This year's survey was directed to nearly 300 research coordinators that currently work with or have worked with CTI CRAs in the past year. Feedback was solicited in the form of eight questions, several of which asked the coordinators to rate the CRA from 1 to 5 (1 needs improvement and 5 being excellent) on various attributes including:

- Protocol/Therapeutic Knowledge
- Ability to Collaborate
- Responsiveness
- Overall Performance

"XXX exceeds expectations on all levels, from Regulatory reconciliations, to source verifications to being available at all hours to assist with enrollment/screening questions.

In my 17 yrs. as a research coordinator XXX has been the best monitor that I have the privilege to work with."

The Results - Consistently Excellent

CTI Cares Spotlight

Helping Heroes Fly is a charity that provides transportation assistance to enlisted men and women. The goal of the charity is to raise money solely through donations to provide airfare to enlisted military members, enabling them to be home with their families at important times, such as holidays, emergencies or family events.

received excellent ratings. Throughout the past eight years, they have averaged a 4.7 rating in Overall Performance, proving once again that CTI CRAs are considered among the best in the business.

Over the last 8 years, CTI CRAs received an average rating of:
(scale of 1 to 5 with 5 being the highest score)

“XXX has been a great asset during this study for our site. **I don't know how we would have been able to manage such a large subject load without her.** We are truly thankful for all of her diligent efforts.”
